

HOMEOWNER PROJECT REPORTING FORM

The Oakmont Village Association (OVA) is recognized as a *Firewise USA* community by the National Fire Protection Association. NFPA recognition makes Oakmont residents eligible for potential homeowners insurance discounts under California's Sustainable Insurance Strategy.

Maintaining *Firewise USA* recognition requires the OVA to report annually on the various mitigations performed by the Architectural Committee, the Firewise Task Force and individual homeowners that contribute to the reduction of wildfire risks throughout Oakmont Village.

By completing this form to report your efforts to make your own home more Firewise, you are helping the OVA maintain its *Firewise USA* recognition. Please check the boxes for all the Firewise actions you have completed, and indicate both the time (in person-hours) and money you spent on the project(s). There is no need to provide any receipts or contractor invoices. Please then submit the completed form to the Architectural Office.
